SECTION 04

04 About Chemotech

CHEMOTECH is a young team of professionals who understand the concept of production, the quality of products and the way to present it. We have earned a reputation for professionalism while working with organisations of repute.

Over time, CHEMOTECH has evolved into a stronger and more focused firm. Our team is more capable than ever, with a vast range of experience, and is always looking for new challenges. At CHEMOTECH, we strive to maintain a professional and ethical work environment that fosters creativity and teamwork. Our experience enables us to give you cost-effective, interactive, well-directed and brainstormed manufacturing without compromising on quality.

Ours is a unique combination of talents and services under one roof, with a relatively small group of professionals who stay focused exclusively on our clients and are versatile and capable of serving most client needs. We are able to deliver consistently excellent quality by specialising in core production services.

We are passionate about the quality of work we do. This is one of the reasons, we believe, that our clients have entrusted us with more and more challenging assignments over the years. Our consultative approach – content-driven and guided by the client's objectives – is time-tested and effective. Our most successful projects are usually collaborative efforts, in which the CHEMOTECH team and the client listen closely to each other, producing strategic and result-oriented solutions.

CHEMOTECH is tough under pressure and strong enough to lead your vision. You can rest assured that everything – from initial concept development, raw material purchase and production to management and direct marketing – will be handled seamlessly.

06 · CHEMOTECH GROUP

Our Execution Approach

Engineering, supply, system integration, installation, commissioning, maintenance and after-sales support.

01
Understand the process requirement and operating conditions.

02
Develop the appropriate technical solution and equipment selection.

03
Coordinate electrical, instrumentation, automation and process requirements.

04
Supply and integrate equipment, panels, instruments and associated systems.

05
Support installation, testing and commissioning.

06
Provide troubleshooting, preventive maintenance and ongoing service support.

Why Work With Us

- Single-point coordination across process, electrical and automation requirements.
- Practical engineering focused on reliability, maintainability and ease of operation.
- Wide product portfolio for industrial utilities and process applications.
- Capability to integrate third-party equipment with PLC / HMI / SCADA based controls.
- Service-oriented support for commissioning, troubleshooting and plant improvement.
